

# Boburov Shukurullo

**Role:** Full-Stack Software Developer

**Location:** Uzbekistan (Open to Remote)

## Professional Summary

Full-stack developer with around 2 years of hands-on experience building web, mobile, and backend systems. Strong at UI implementation, CRUD systems, authentication, and API integration. Comfortable working independently on MVPs, startups, and automation-focused projects. Looking for remote opportunities and growth toward senior-level system design.

## Core Skills

JavaScript, TypeScript, Node.js, NestJS, React, Next.js, Flutter, Dart, PostgreSQL, Prisma, REST APIs, JWT Authentication, Telegram Bots, Automation Scripts, Git

## Frameworks & Tools

Next.js (App Router), React Hooks, Tailwind CSS, Flutter UI, Prisma ORM, Supabase, AWS (basic), Linux, Docker (basic), Playwright (testing), OBS, CI basics

## Project Experience

### SevenEdu – Online Course Platform

- Full-stack course platform with video lessons, quizzes, tests, vocabulary, and user dashboards
- Built client and admin panels using Next.js and REST APIs
- Implemented authentication, payments, progress tracking, and certificates

### Telegram Bots

- Built automation and management bots using Python and Node.js
- Features include admin panels, scheduled posting, statistics, and user management

### Mobile Apps (Flutter)

- Developed cross-platform mobile apps focused on clean UI and API-driven logic
- Experience converting web platforms into mobile applications

## Experience Level

Strong Junior / Mid-Level Developer

Comfortable with real-world projects, still improving architecture, performance, and scalability skills

## Languages

English – Technical working proficiency
